Experience

UX Manager / Tech Project Lead — Jan 2019 – Dec 2023
Revive Superfoods — *Toronto, CA*
- Established UX/TECH department with full-stack developers, data analysts, QA analysts, AWS specialists, UX designers, testers, and researchers
- Coordinated with upper management to strategize and execute company goals
- Led and maintained integration on 3 different sales channels including Amazon, Walmart, and Costco
- Established and hit department KPIs, overseeing 1000+ kanban tickets, 25+ projects, and 100+ website enhancements
- Implemented data systems to prioritize Tech and UX KPIs, earning $1M in projected annual revenue
- Managed communication between departments to ensure alignment on projects and product cycles

Owner/Founder — Jan 2022 – May 2023
Kaiss Express — *Toronto, ON*
- Founded and established a family-run final-mile delivery service covering the Greater Toronto Area (GTA)
- Developed an efficient delivery model for perishable items, achieving profitability within the first week
- Led a team responsible for order management, route optimization, and driver communication

UX Designer/Copywriter — Jan 2018 – 2019
Revive Superfoods — *Toronto, ON*
- Delivered low, medium, and hi-fi designs following a structured product life cycle
- Utilized Figma to prototype and deliver mobile-friendly designs
- Collaborated in cross-department presentations and brainstorming sessions for UX/UI enhancements

Projects

AI Generated Personal Portfolio Website | *Next.js, React, AI Tools* — 2024
- Developed a fully AI-generated portfolio website showcasing technical skills and projects
- Integrated AI-generated interactive elements and optimized performance using AI-driven strategies
- Implemented AI-assisted SEO optimization to improve website visibility and search engine performance

Content Story V1: Automated Multimedia Storytelling | *ChatGPT, ElevenLabs, Midjourney, Airtable* — 2024
- Created an automated system for turning written content into engaging video narratives
- Integrated multiple AI technologies to handle scripting, voiceovers, and visual generation
- Developed a scalable production system capable of handling large volumes of content

AI Learning Hub | *Python, Tkinter, AI Concepts* — 2024
- Designed an interactive learning platform to teach AI concepts through gamification
- Developed modular learning experiences with hands-on coding challenges and progress tracking
- Implemented user interaction analytics to continuously improve the learning experience

Advanced AI Generated Art & Community Engagement | *Midjourney, ChatGPT, Discord* — 2022 – Present
- Created unique AI-generated artworks blending various aesthetics, gaining over 20,000 TikTok followers
- Established successful monetization through sponsorships and Patreon
- Demonstrated commercial viability of AI-generated art in the creative industry

Education

York University — Toronto, ON
BSc, Psychology — *Sep 2018 – Dec 2023*
